DETAILED ACTION

1. After a further consideration of Ambrisco et al. reference, a new ground rejection is made as follow. Claims 1-3, 5-7 and 18 are pending. Claim 2 and 3 are withdrawn from consideration.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 7 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Ambrisco et al. (6,007,557). Ambrisco et al. disclose a tubular member (32 or 20), a shaft (42), an expandable frame (72), a cantilever beam (62) including a weakened region (the region that are further from the attached point of the beam 62 and the frame 72) and a filter mesh (80).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ambrisco et al. (6,1007,557). Although, Ambrisco et al. does not disclose the beam being made from nitinol, nitinol is a well-known biocompatible material in the art.

Art Unit: 3731

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to make Ambrisco et al.'s beam from nitinol in order to provide a biocompatible beam for a filter apparatus which is inserted in a blood vessel.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to (Jackie) Tan-Uyen T. Ho whose telephone number is 571-272-4696. The examiner can normally be reached on MULTIFLEX Mon. to Sat..
